DETAILED ACTION

Election/Restrictions

1. It is noted that applicants elected group XI with traverse in paper dated 3/6/2007. Claim 62 was mistakenly labeled as being part of group XI. Claim 62 is drawn to a compound wherein the C ring with the phenyl to which it is attached makes a chroman ring. This does not fit within the elected grouping. This part of claim 62 was not searched or examined in the first office action dated 6/4/2007. Due to this, the elected material, namely group XI, is drawn to claims 14-27. Claim 62 is non-elected. The restriction was made final in paper dated 6/4/2007.

2. Claim 62 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 14-27 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, for the reasons of record. Applicant argues that more than 70 compounds

were synthesized that fall within the scope of formula II. However, those 70+ compounds are within the smaller markush described in paper dated 6/4/07. Specifically, formula II' wherein C is cyclohexyl or cyclopentyl substituted in the 1 position with R', the phenyl ring of the C bicycle has only one substituent in the 6 position (when C is a cyclohexyl) or 5 position (when C is cyclopentyl) wherein the substituent is -alkyl-amine, the amine can be either N-di(Alkyl), NH(alkyl) or piperidine; Ra is H; R1 is phenyl and R2 is naphthyl. This is a much smaller group within the larger markush of formula II'. The compounds of the instant claims must be enabled for the instantly disclosed utility, namely treatment of inflammation-related disorders. However, the pharmacological art is unpredictable. Only compounds that have been enabled can obtain patent protection. Further, there is undue experimentation required to make and use compounds wherein the different R groups are in specific positions in all of the examples and the markush being claimed allows the R groups to be in multiple positions. Due to this, the rejection is maintained.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
